Suppliers

Results

The solution saves valuable time in document collection and strengthens the reliability of supplier records. Teams now benefit from centralized information, structured by third parties and markets, streamlining controls, reducing lead times, and improving transparency for elected officials and internal stakeholders.

"The integration of AprovaLL with Ivalua allows us to sustainably improve the reliability of our supplier management. Data is centralized, up to date, and instantly accessible, significantly streamlining the work of our procurement teams."

About Vallourec

Industry
High-tech industry

Countries
International

Employees
350 AprovaLL users

Spent
3.6 billion euros

Vallourec delivers world-class tubular solutions for the energy industry and other highly demanding industrial applications.

Challenge

Prior to the deployment of the Ivalua & AprovaLL solution, supplier management was based on heterogeneous and largely manual processes in a multi-ERP, international environment. Document collection depended on fragmented exchanges and multiple reminders, making lead times hard to control. The absence of centralized data limited traceability, complicated audits, and heightened the risks of non-compliance and fraud.

Legal & Documentation

Automated document collection based on specific supplier attributes.

Legal compliance

Anti-corruption identification process

Finance

Bank fraud prevention and financial monitoring

Solution

The solution relies on the integration of AprovaLL with Ivalua, allowing automated collection and updating of supplier information. Data and documents are centralized, aligned with procurement processes, and directly accessible within the Ivalua environment. This approach guarantees reliable, structured, and actionable supplier records for all stakeholders.

"By automating document collection and securing data, we have greatly reduced the administrative workload of procurement teams. They can now focus on supplier performance and value creation, instead of time-consuming control and follow-up activities."
